Ailis Man Multi-Asset

Sub-fund of Ailis Sicav

Class R (ISIN LU1804102447) / Class S (ISIN LU1804102520)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, aims to generate capital growth over a period of 5 years starting from 19th June 2018 (the Principal Investment Period) by providing dynamic exposure to a diversified range of asset classes and to provide a positive return, measured in Euro, with a stable level of volatility regardless of market conditions. The Sub-Fund is suitable for investors who search medium term investments and the investor must be able to accept a certain volatility and the possibility of losing part of the invested amount. The Sub-Fund has been designed for investors who will invest in the Sub-Fund during the Initial Subscription Period and will hold their investment until the end of the Principal Investment Period. The return forecasts may differ if the investor does not intend to hold the investment until the end of the Principal Investment Period.

The Sub-Fund seeks to achieve its investment objective by investing in accordance with a quantitative strategy, with the aim to provide stable risk exposures (primarily through the use of financial derivative instruments) to all markets and asset classes including, but not limited to: equity index futures, government bond futures, inflation linked bonds, credit default swaps, and commodity index swaps. The Sub-fund is actively managed.

The Sub-Fund implements its strategy by investing directly or indirectly – through units/shares of UCITS and /or UCIs – mainly in:

- exchange traded and OTC financial derivative instruments;
- transferable securities, which may include but are not limited to: listed equities securities and common stock (across all industrial and geographical sectors and market capitalizations) and fixed income instruments (including fixed and/or floating rate, government and/or corporate bonds - investment and non investment grade - and inflation linked bonds), deposits, cash or cash equivalents and money market instruments.

The Sub-Fund exposure to the above-mentioned asset classes achieved by indirect investments may not exceed 30% of its net assets. The Sub-Fund may obtain exposure:

- up to 60% of its net assets in equities instruments;

- up to 30% of its net assets in non-investment grade instruments;
- up to 30% of its net assets in a range of Risk Premia (Momentum and Carry), across multiple asset classes. Risk Premia exists due to systematic risks and behavioural patterns in financial markets, and may be exploited to provide returns with low correlation to traditional markets. Momentum Strategies buy markets that are trending up and sell markets that are trending down and create positive returns when those trends persist. Carry Strategies create positive returns when the prices of the instruments used remain relatively stable allowing differential in yields to accrue gradually over time;
- up to 30% of its net assets in instruments issued by entities located in emerging markets.

During the Initial Subscription Period (from 23rd April 2018 to 18th June 2018) the Sub-Fund will hold 100% of its net assets in cash, denominated in Euro.

The Sub-Fund may use financial derivative instruments for investment purposes, risk hedging and efficient portfolio management. The Sub-fund may invest without limitation in instruments denominated in currencies other than the reference currency (EUR).

The Sub-Fund will not invest in asset backed securities ("ABS"), mortgage backed securities ("MBS") nor in contingent convertible securities ("CoCos"), nor in distressed securities nor in default securities.

Once the terms of the Principal Investment Period have expired, there will be progressive investment seeking to consolidate the performance achieved.

The Sub-Fund is not managed in reference to a benchmark.

The Sub-Fund has two Share-Classes: Class R is a capitalization Share-Class. With reference to the Share-Class S, the net incomes of the Sub-Fund will be distributed in accordance with the Prospectus of the Fund. You may request to redeem the shares held at any moment, by sending a request on any business day.

- This Sub-Fund is classified in the risk and reward category 5 because the investments value can be subject to significant daily variation, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.

- **Developing market risk:** The Sub-Fund is exposed to securities highly sensitive to political and economic instability of developing

countries such as civil conflicts, changes in government policies and in taxation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made. Price changes may be higher than those in the markets of developed countries.

- **Derivative risk:** in order to achieve its objectives, the Sub-Fund may use derivative instruments whose value may be subject to price fluctuations, positive or negative, much larger than those of the securities in the same Sub-Fund.
- **Counterparty risk:** The Sub-Fund invests into instruments, such as derivatives, by entering into contracts with financial counterparties, exposing itself to the risk that said intermediaries may generate financial damage to the fund itself by not fulfilling their obligations in the future.
